hello@6ixmediasa.com

6ixmediasa.com

Rental marketplace

Rent anything by the hour, day or week, with availability calendars, deposits, damage claims and owner payouts handled automatically.

The problem

- Double bookings are the fastest way to lose a customer
- Deposits and damage disputes are handled on WhatsApp and forgotten
- Owners have no idea which items actually earn

Who it suits

- Equipment and tool hire
- Event and party supply
- Camping and outdoor gear
- Vehicle, trailer and venue hire

How you earn

- Commission per hire
- Deposit handling fee
- Insurance or damage waiver margin
- Featured listings

Who uses it

Each role sees a different interface. Designing them separately is what keeps each one simple.

Hirer

- ✓ Searches by date and area
- ✓ Checks live availability
- ✓ Pays hire and deposit
- ✓ Returns and gets deposit back

Owner

- ✓ Lists items with rates
- ✓ Blocks out unavailable dates
- ✓ Confirms collection and return
- ✓ Claims for damage

Admin

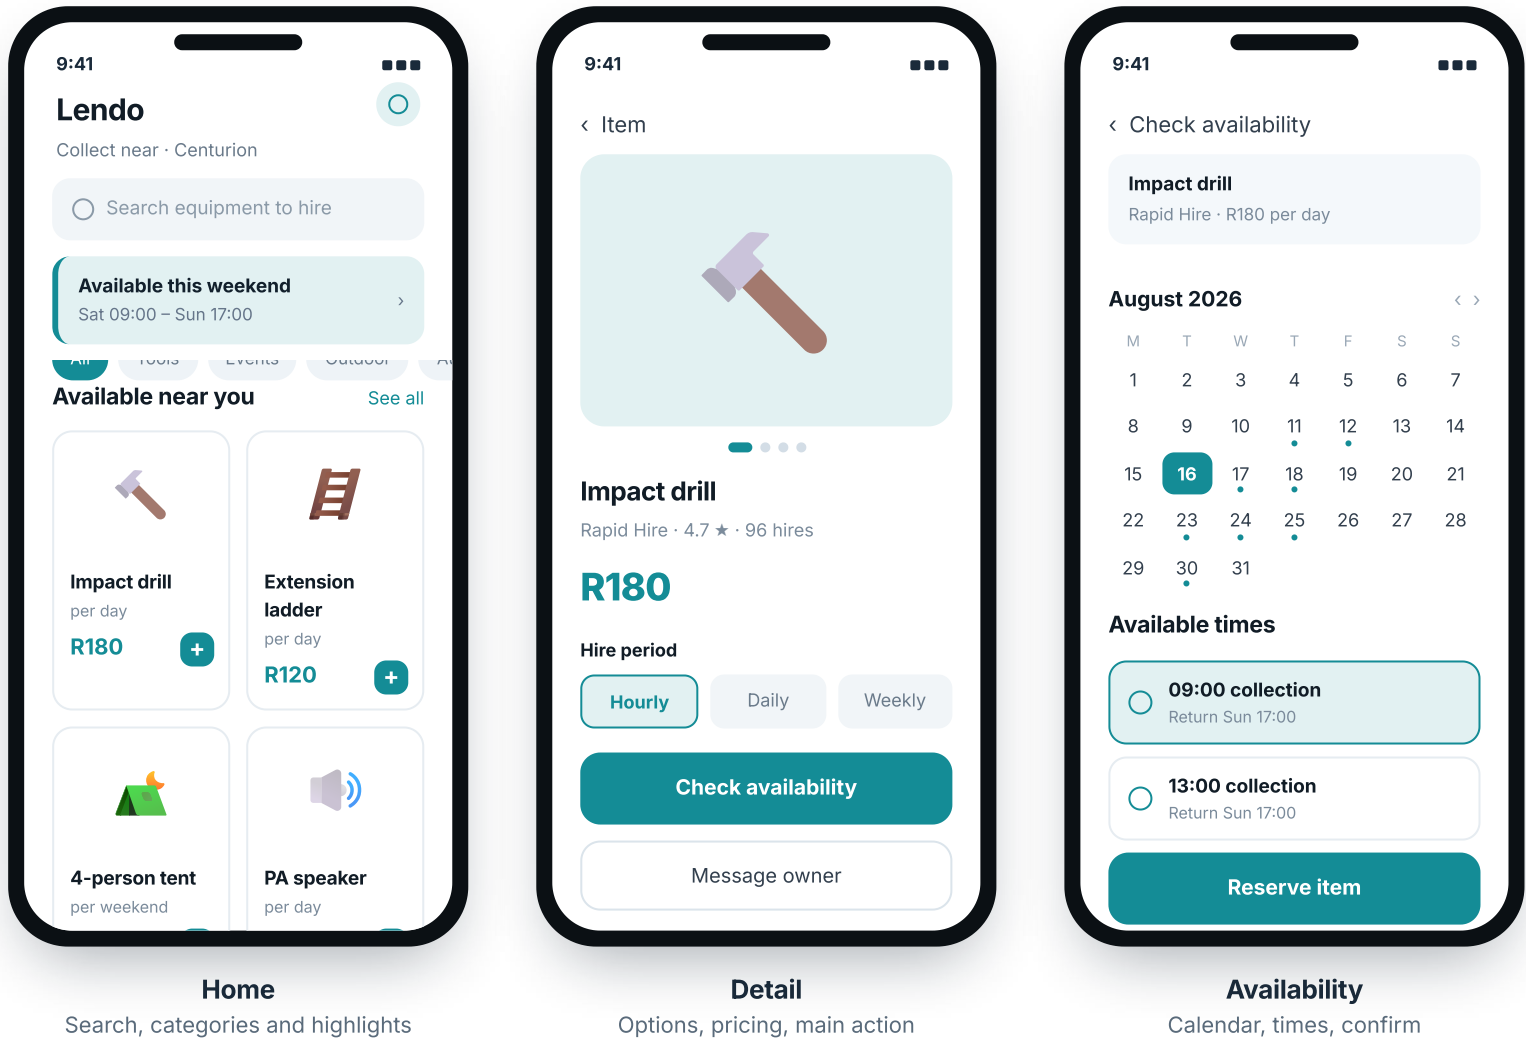

- ✓ Approves owners
- ✓ Sets commission and deposit rules
- ✓ Arbitrates damage claims
- ✓ Reports on utilisation

DRIVER — OPTIONAL

- ✓ DELIVERS AND COLLECTS ITEMS
- ✓ CAPTURES CONDITION PHOTOS
- ✓ CONFIRMS HANDOVER
- ✓ TRACKS EARNINGS

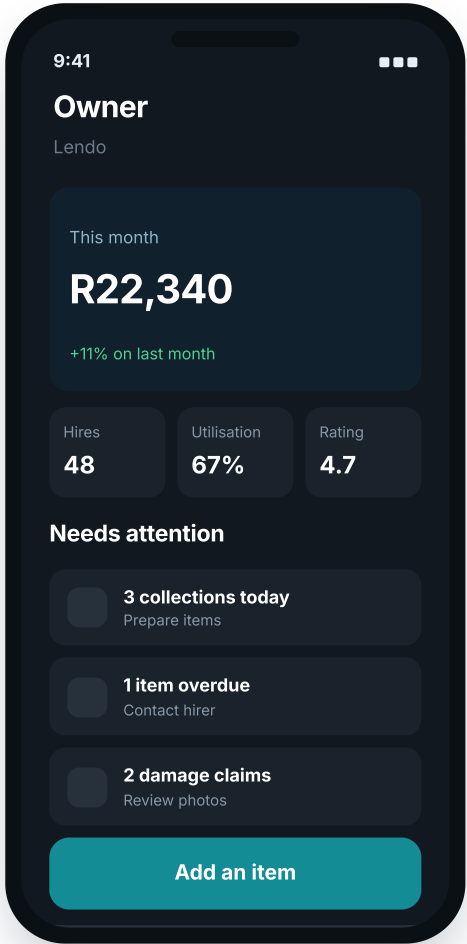

Customer app

Three of the customer screens. Built for one-handed use, and for a phone on mobile data rather than office wifi.

Owner app

The supply side runs from a phone. Most people on a platform like this do not sit at a laptop.

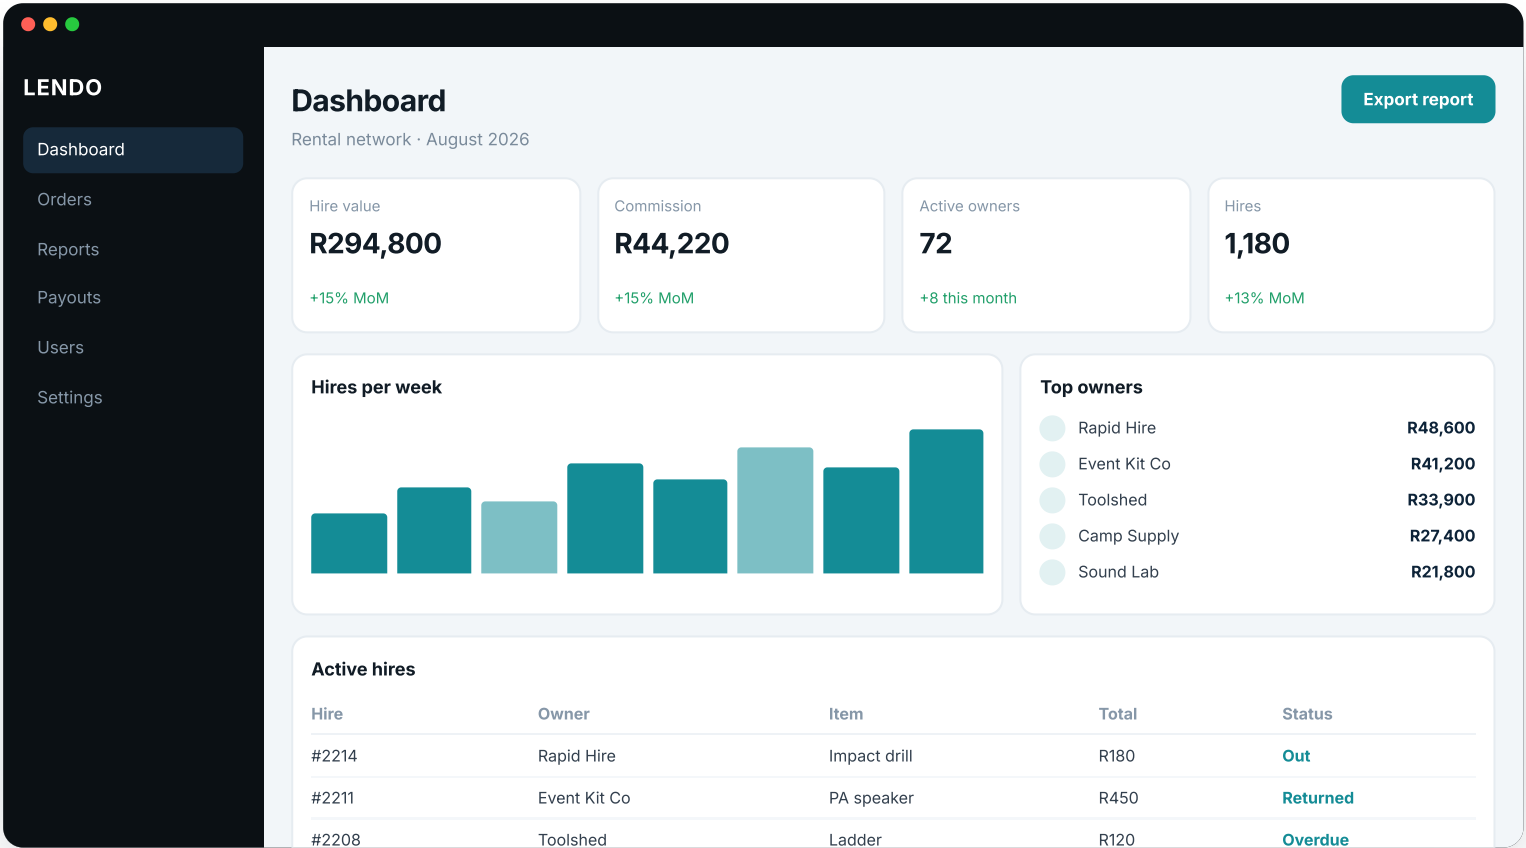

Owner dashboard

Earnings, jobs to action, alerts

Admin dashboard

The operator's view. Revenue, top performers and live activity in one place.

What gets built

Every module below is included in the standard build. Anything outside this list is quoted separately before it starts.

Availability

- + Calendar per item
- + Hourly, daily and weekly rates
- + Buffer time between hires
- + Blackout dates

Deposits

- + Held at booking
- + Released on clean return
- + Partial deduction for damage
- + Full audit trail

Condition

- + Photos at collection and return
- + Condition checklist
- + Damage claim workflow
- + Dispute arbitration

Logistics

- + Collection or delivery
- + Late return penalties
- + Extension requests
- + Reminders

Payments

- + PayFast, Yoco and Ozow
- + Deposit separate from hire
- + Owner payouts
- + Refund handling

Admin

- + Owner onboarding
- + Commission rules
- + Utilisation reporting
- + Claim oversight

How it is built

Chosen for hosting cost and for how easily you can find a developer later. Nothing exotic.

Front end

› Next.js and React

› Tailwind CSS

› Server rendered for search

› Installable web app

Back end

› Node.js API

› PostgreSQL database

› Object storage for images

› Background jobs

Mobile

› React Native, one codebase

› iOS and Android together

› Push notifications

› Offline handling

Integrations

› PayFast, Yoco, Ozow

› SMS and email

› Maps where needed

› Analytics

Hosting

› Standard cloud hosting

› Scales with traffic

› Daily backups

› SSL and patching

Handover

› Source code is yours

› Written documentation

› Admin training

› Optional support retainer

Build phases

Each phase ends with something you can open and use. Nothing is invisible for weeks at a time.

What it costs

Fixed price for the scope described. Split across the phases above, each invoiced on completion.

Starter

Web platform only, no mobile apps

R12,000

✓ All customer and provider web screens

✓ Admin dashboard

✓ One payment gateway

✓ 8 week build

RECOMMENDED

Standard

Web plus customer mobile apps

R18,000

✓ Everything in Starter

✓ iOS and Android customer apps

✓ Store submission handled

✓ Push notifications

Complete

Web plus customer and provider apps

R28,000

✓ Everything in Standard

✓ Provider mobile app

✓ Advanced reporting

✓ 3 months support included

Prices exclude VAT where applicable. Half to book the slot, balance across the phases. Hosting, gateway and app store fees are paid by you directly, at cost.

If you can imagine it, we can design it.
