How it works

Payment terms

Half to book your slot in the schedule, half on launch. Larger builds are split across agreed milestones, each invoiced on completion of that stage.

What is included

Every website package comes with hosting and a domain for the first year, an SSL certificate, and handover training so you can update the site yourself.

What is not included

Ad spend, stock photography licences and third-party subscriptions are billed at cost or paid by you directly.

Delivery

Websites and logos are typically live in three to ten days once we have your content. Apps take two to three weeks. If you are working to a fixed deadline, tell us before accepting the quote.

Validity

Prices exclude VAT where applicable and are valid at the time of quoting. Rush work outside normal turnaround may carry a surcharge, which we tell you about before you commit.

Not sure what you need

Send us what your business does and roughly what you are trying to achieve. We will tell you which package fits, including when the cheaper one is the right answer. The quote is free and there is no follow-up if you decide against it.

If you can imagine it, we can design it.

Tell us what you are building and we will send a fixed price in rand, usually within a day.
