PRODUCT SPECIFICATION

Tablo

Restaurant ordering and delivery

Multi-restaurant food ordering with modifiers, kitchen displays, driver dispatch and live tracking, built for the pace a busy kitchen actually runs at.

Restaurant ordering and delivery

Multi-restaurant food ordering with modifiers, kitchen displays, driver dispatch and live tracking, built for the pace a busy kitchen actually runs at.

The problem

- Kitchens do not have time to learn software
- Orders arriving on a tablet nobody watches get missed
- Drivers idle while food goes cold, or arrive before it is ready

Who it suits

- Food delivery startups
- Restaurant groups going direct
- Township and campus delivery networks
- Dark kitchen operators

How you earn

- Commission per order
- Delivery fee margin
- Restaurant subscription tiers
- Promoted placement in search

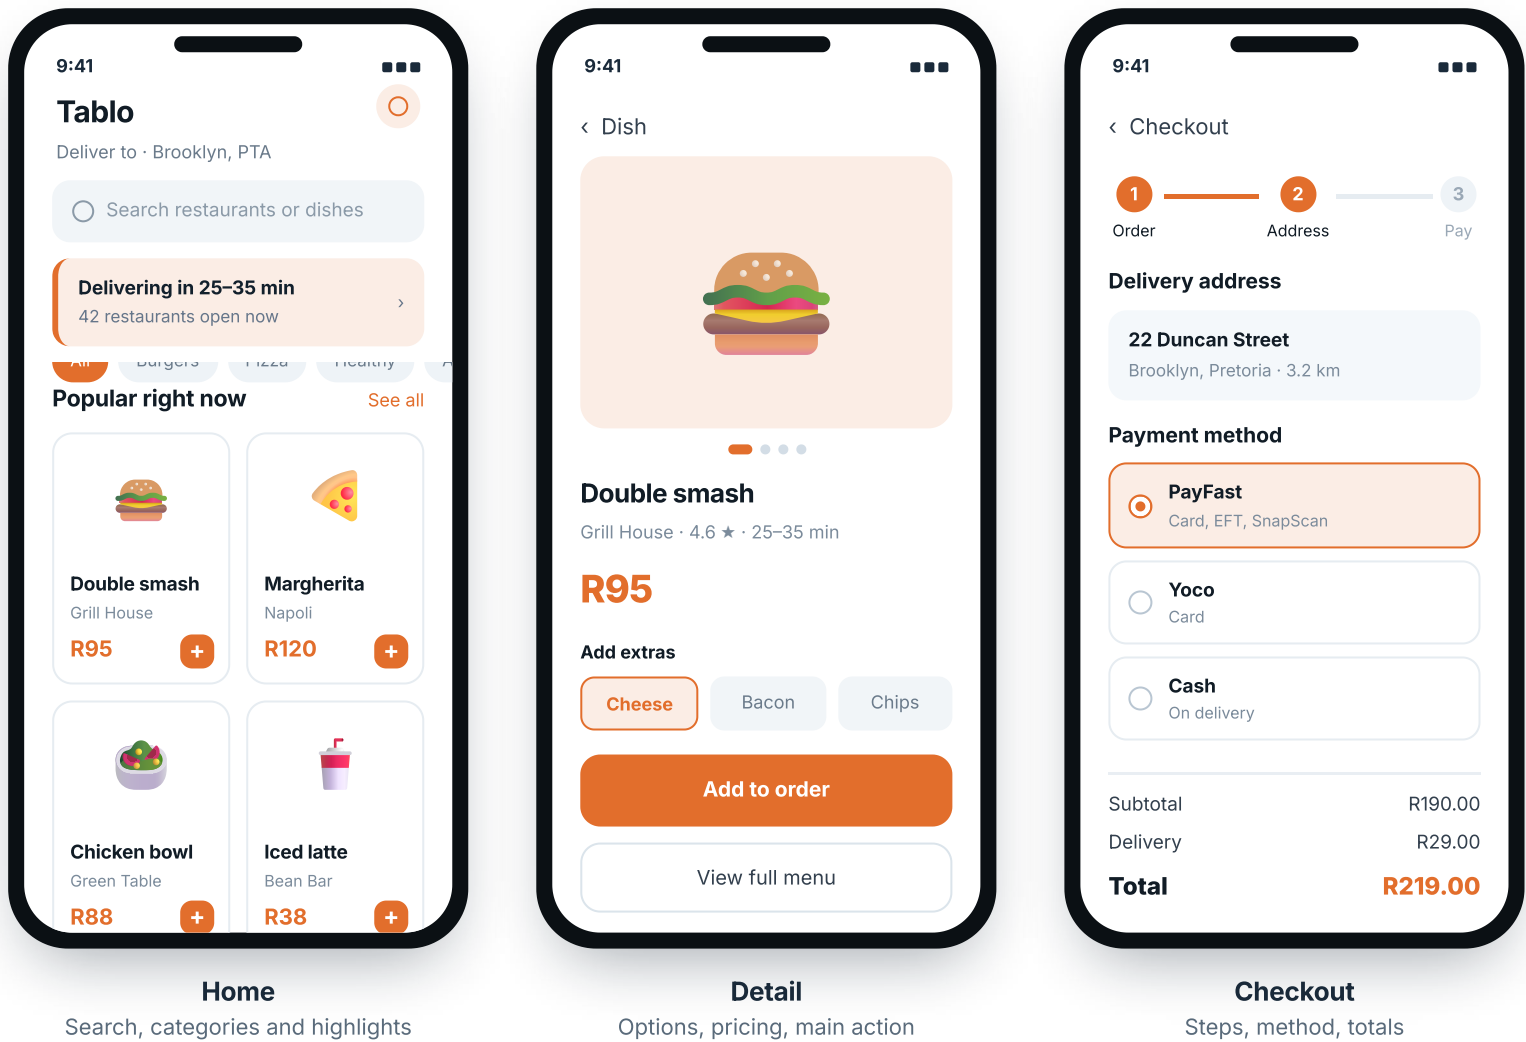

Who uses it

Each role sees a different interface. Designing them separately is what keeps each one simple.

Customer ✓ Browses restaurants and dishes ✓ Customises with modifiers ✓ Tracks the driver live ✓ Rates the order	Restaurant ✓ Accepts or rejects orders ✓ Sets prep time ✓ Marks items sold out ✓ Sees daily takings	Driver ✓ Accepts nearby jobs ✓ Navigates to pickup and drop ✓ Confirms handover ✓ Tracks earnings	Admin ✓ Onboards restaurants ✓ Sets commission and fees ✓ Manages driver pool ✓ Handles refunds
--	---	---	---

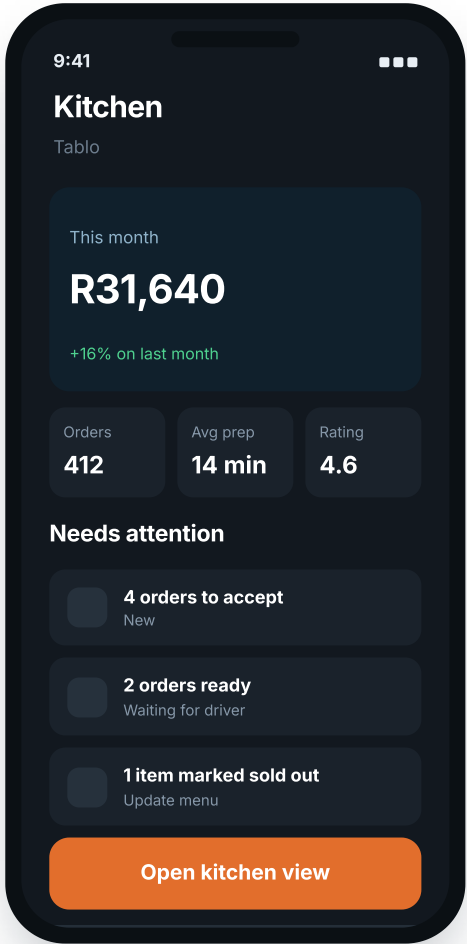

Customer app

Three of the customer screens. Built for one-handed use, and for a phone on mobile data rather than office wifi.

Kitchen app

The supply side runs from a phone. Most people on a platform like this do not sit at a laptop.

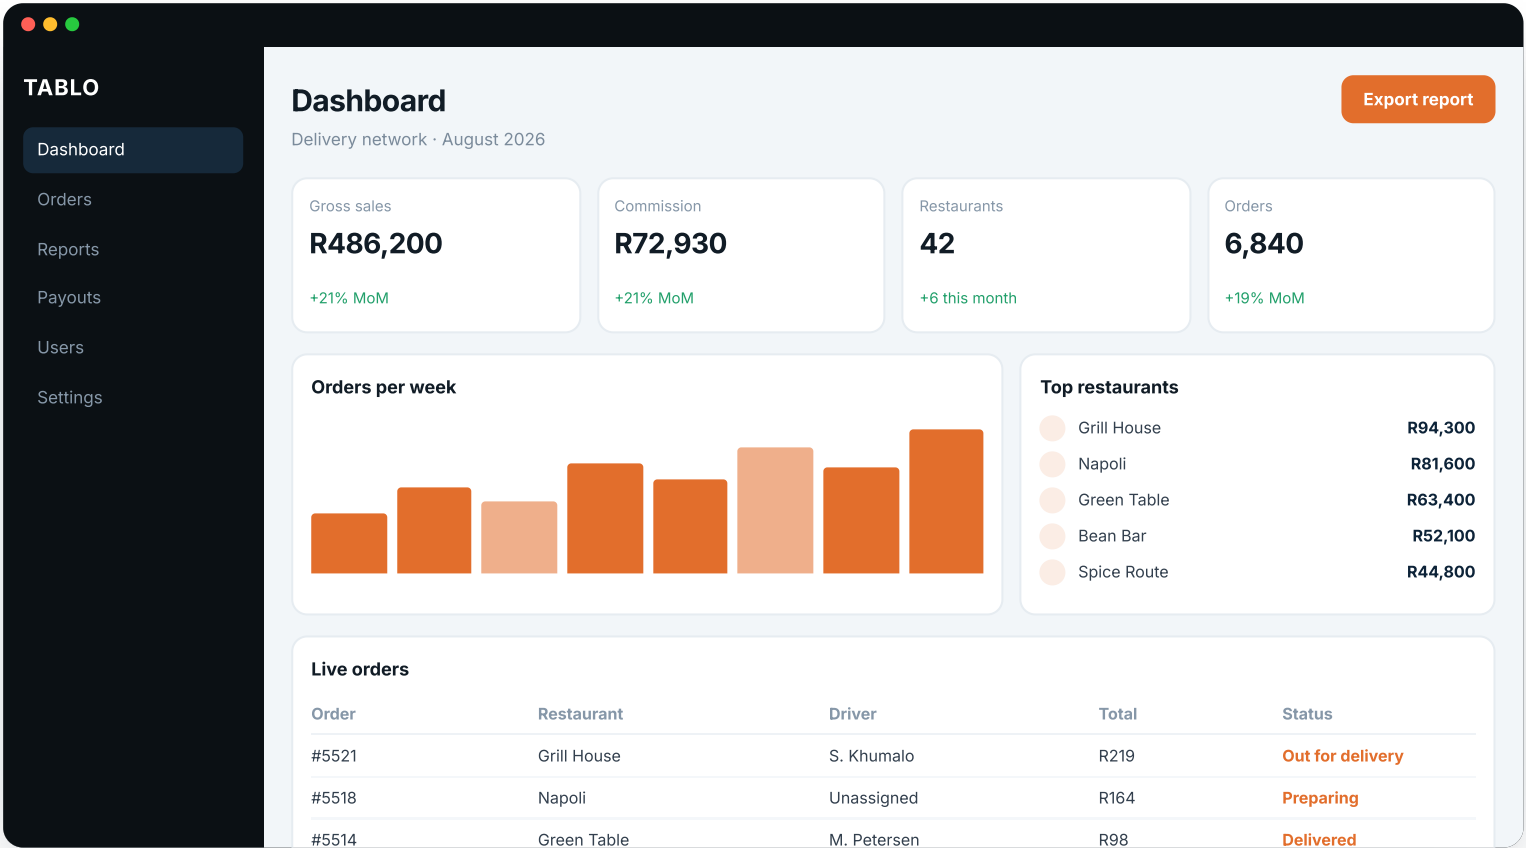

Kitchen dashboard

Earnings, jobs to action, alerts

Admin dashboard

The operator's view. Revenue, top performers and live activity in one place.

What gets built

Every module below is included in the standard build. Anything outside this list is quoted separately before it starts.

Menus

- + Categories and dishes
- + Modifiers and combos
- + Sold-out toggles
- + Scheduled availability

Ordering

- + Basket per restaurant
- + Scheduled and pre-orders
- + Promo codes
- + Reorder in one tap

Kitchen

- + Order acceptance screen
- + Prep timer
- + Ticket printing
- + Daily summary

Dispatch

- + Driver matching by distance
- + Live GPS tracking
- + Batch deliveries
- + Proof of handover

Payments

- + Card, EFT and cash
- + Split by restaurant
- + Driver payout runs
- + Refunds and credits

Admin

- + Commission per restaurant
- + Zone and fee management
- + Performance reporting
- + Dispute handling

How it is built

Chosen for hosting cost and for how easily you can find a developer later. Nothing exotic.

Front end

> Next.js and React

> Tailwind CSS

> Server rendered for search

> Installable web app

Back end

> Node.js API

> PostgreSQL database

> Object storage for images

> Background jobs

Mobile

> React Native, one codebase

> iOS and Android together

> Push notifications

> Offline handling

Integrations

> PayFast, Yoco, Ozow

> SMS and email

> Maps where needed

> Analytics

Hosting

> Standard cloud hosting

> Scales with traffic

> Daily backups

> SSL and patching

Handover

> Source code is yours

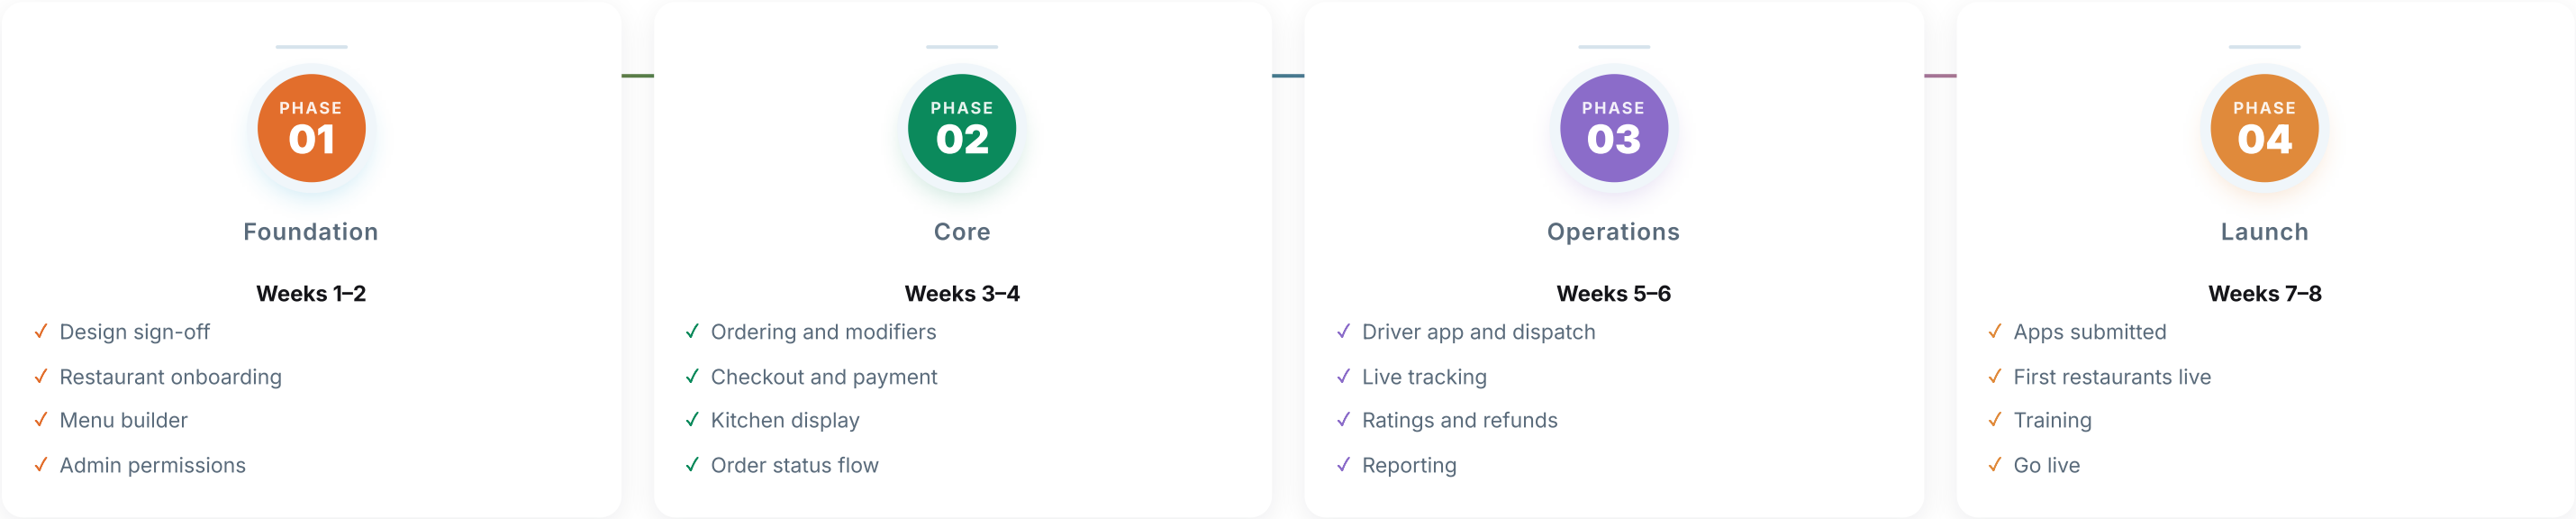

> Written documentation

> Admin training

> Optional support retainer

Build phases

Each phase ends with something you can open and use. Nothing is invisible for weeks at a time.

What it costs

Fixed price for the scope described. Split across the phases above, each invoiced on completion.

Starter

Web platform only, no mobile apps

R12,000

✓ All customer and provider web screens

✓ Admin dashboard

✓ One payment gateway

✓ 8 week build

RECOMMENDED

Standard

Web plus customer mobile apps

R18,000

✓ Everything in Starter

✓ iOS and Android customer apps

✓ Store submission handled

✓ Push notifications

Complete

Web plus customer and provider apps

R28,000

✓ Everything in Standard

✓ Provider mobile app

✓ Advanced reporting

✓ 3 months support included

Prices exclude VAT where applicable. Half to book the slot, balance across the phases. Hosting, gateway and app store fees are paid by you directly, at cost.

If you can imagine it, we can design it.
