Multi-vendor marketplace

A marketplace where independent sellers list their own products, manage their own stock and get paid automatically, while you take a commission on every order.

The problem

- Building a marketplace from scratch takes six months and a large budget
- Most of that goes into onboarding, payouts and disputes
- None of it is visible to customers, and none of it sells anything

Who it suits

- Anyone aggregating independent sellers
- Craft, electronics, agriculture, spares, fashion
- Township and community trading networks
- Retailers opening up to third-party sellers

How you earn

- Commission per order, set by category or vendor
- Listing or subscription fees per vendor
- Featured placement and promoted listings
- Delivery margin where you control logistics

Who uses it

Each role sees a different interface. Designing them separately is what keeps each one simple.

Customer

- ✓ Browses across all vendors
- ✓ One basket, several sellers
- ✓ Tracks orders, messages sellers
- ✓ Rates after delivery

Vendor

- ✓ Applies with documents
- ✓ Manages products and stock
- ✓ Packs orders, prints labels
- ✓ Sees earnings and payouts

Admin

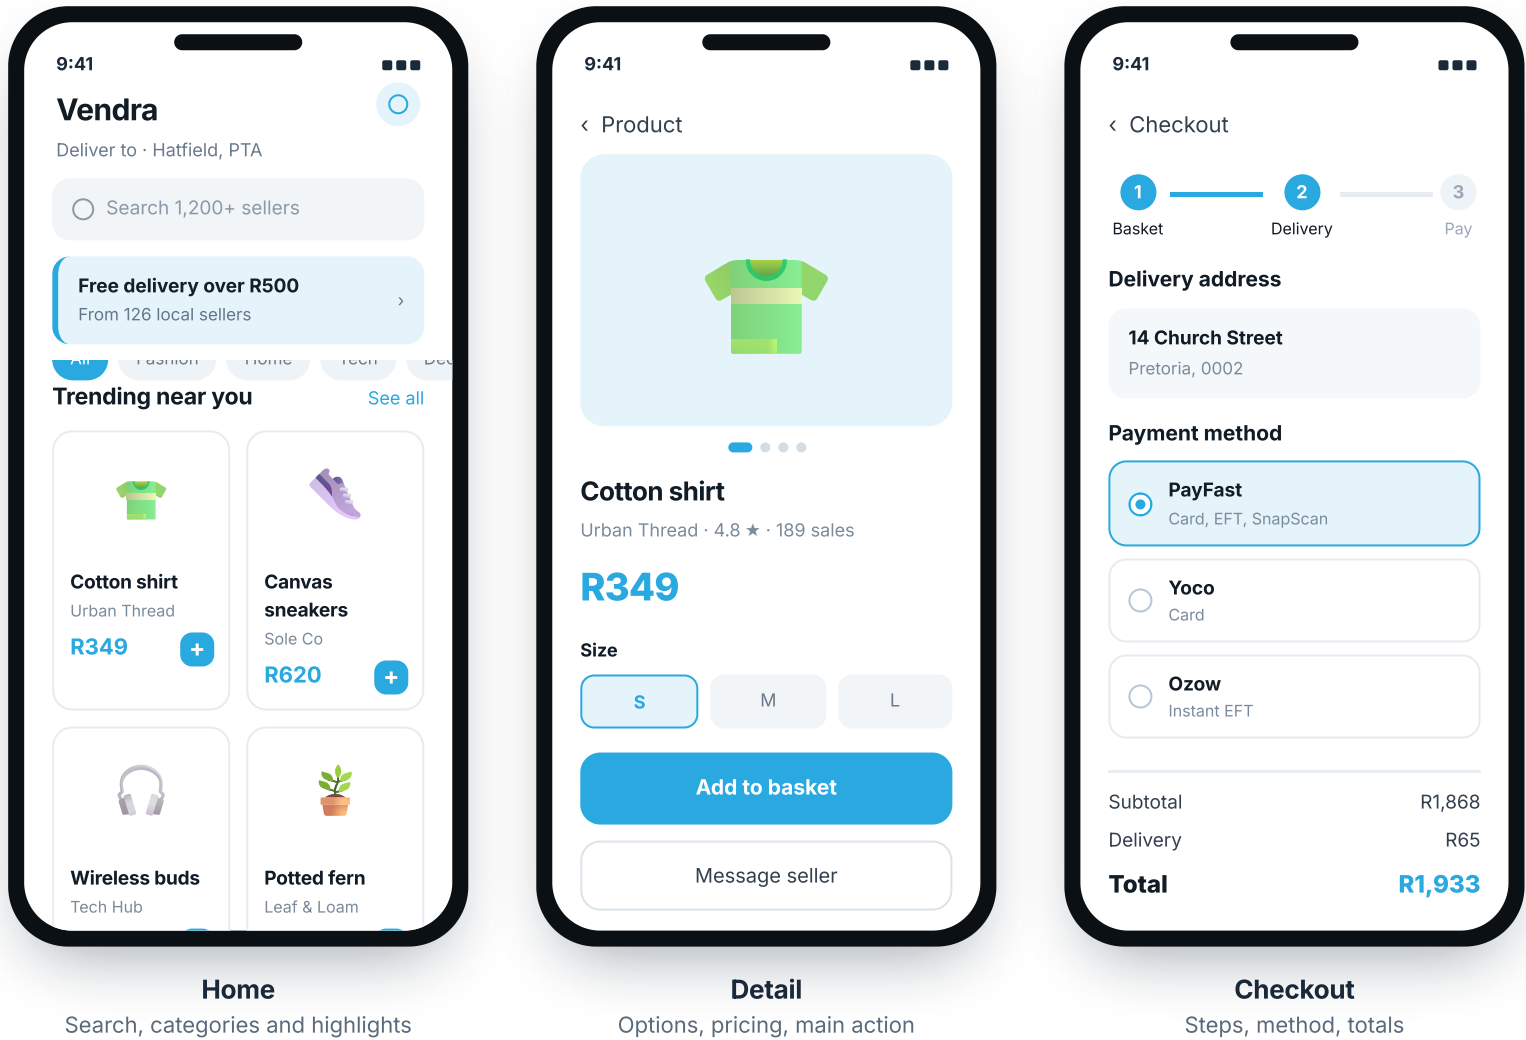

- ✓ Approves vendor applications
- ✓ Sets commission rules
- ✓ Runs payouts, resolves disputes
- ✓ Sees the whole marketplace

DRIVER — OPTIONAL

- ✓ ACCEPTS ASSIGNED DELIVERIES
- ✓ NAVIGATES AND UPDATES STATUS
- ✓ CAPTURES PROOF OF DELIVERY
- ✓ TRACKS OWN EARNINGS

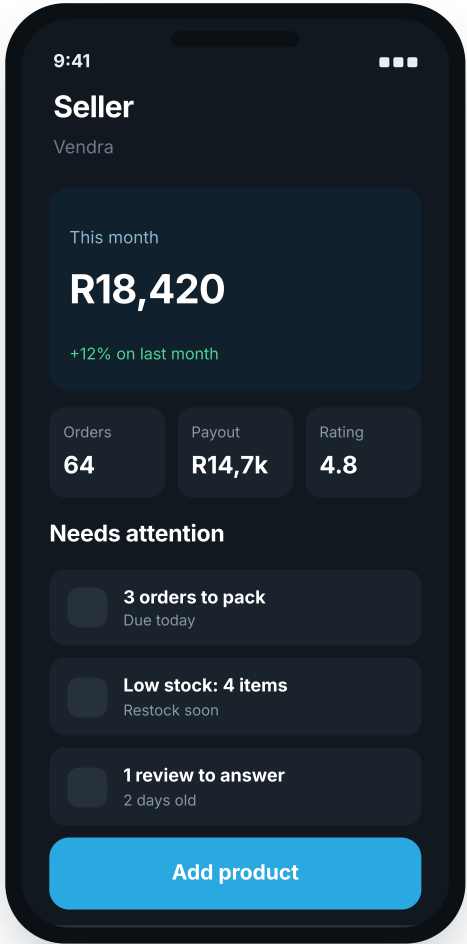

Customer app

Three of the customer screens. Built for one-handed use, and for a phone on mobile data rather than office wifi.

Seller app

The supply side runs from a phone. Most people on a platform like this do not sit at a laptop.

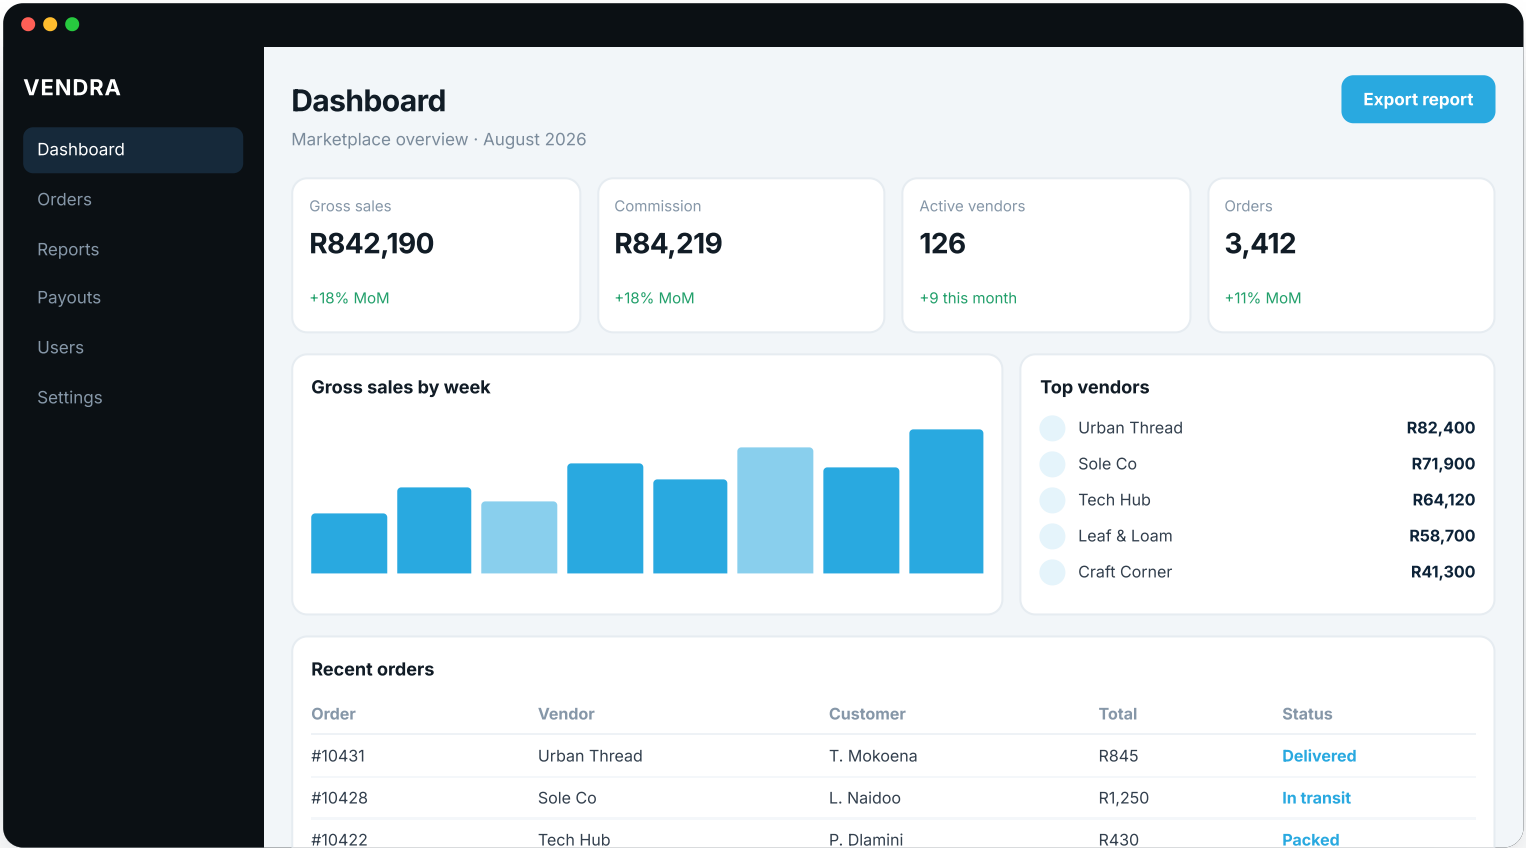

Seller dashboard

Earnings, jobs to action, alerts

Admin dashboard

The operator's view. Revenue, top performers and live activity in one place.

What gets built

Every module below is included in the standard build. Anything outside this list is quoted separately before it starts.

Vendor onboarding

- + Application with document upload
- + Admin approval workflow
- + Vendor storefront page
- + Bank details for payouts

Catalogue

- + Products with variants
- + Categories and attributes
- + Stock per variant
- + Bulk import from spreadsheet

Orders

- + Multi-vendor basket
- + Order splitting per vendor
- + Status tracking end to end
- + Cancellations and refunds

Payments

- + PayFast, Yoco and Ozow
- + Split payments by vendor
- + Commission deducted automatically
- + Payout statements

Trust

- + Ratings both ways
- + Review moderation
- + Dispute flow with arbitration
- + Fraud reporting

Admin

- + Commission by category or vendor
- + Vendor performance reporting
- + Promotions and featured slots
- + Full audit trail

How it is built

Chosen for hosting cost and for how easily you can find a developer later. Nothing exotic.

Front end

- > Next.js and React
- > Tailwind CSS
- > Server rendered for search
- > Installable web app

Back end

- > Node.js API
- > PostgreSQL database
- > Object storage for images
- > Background jobs

Mobile

- > React Native, one codebase
- > iOS and Android together
- > Push notifications
- > Offline handling

Integrations

- > PayFast, Yoco, Ozow
- > SMS and email
- > Maps where needed
- > Analytics

Hosting

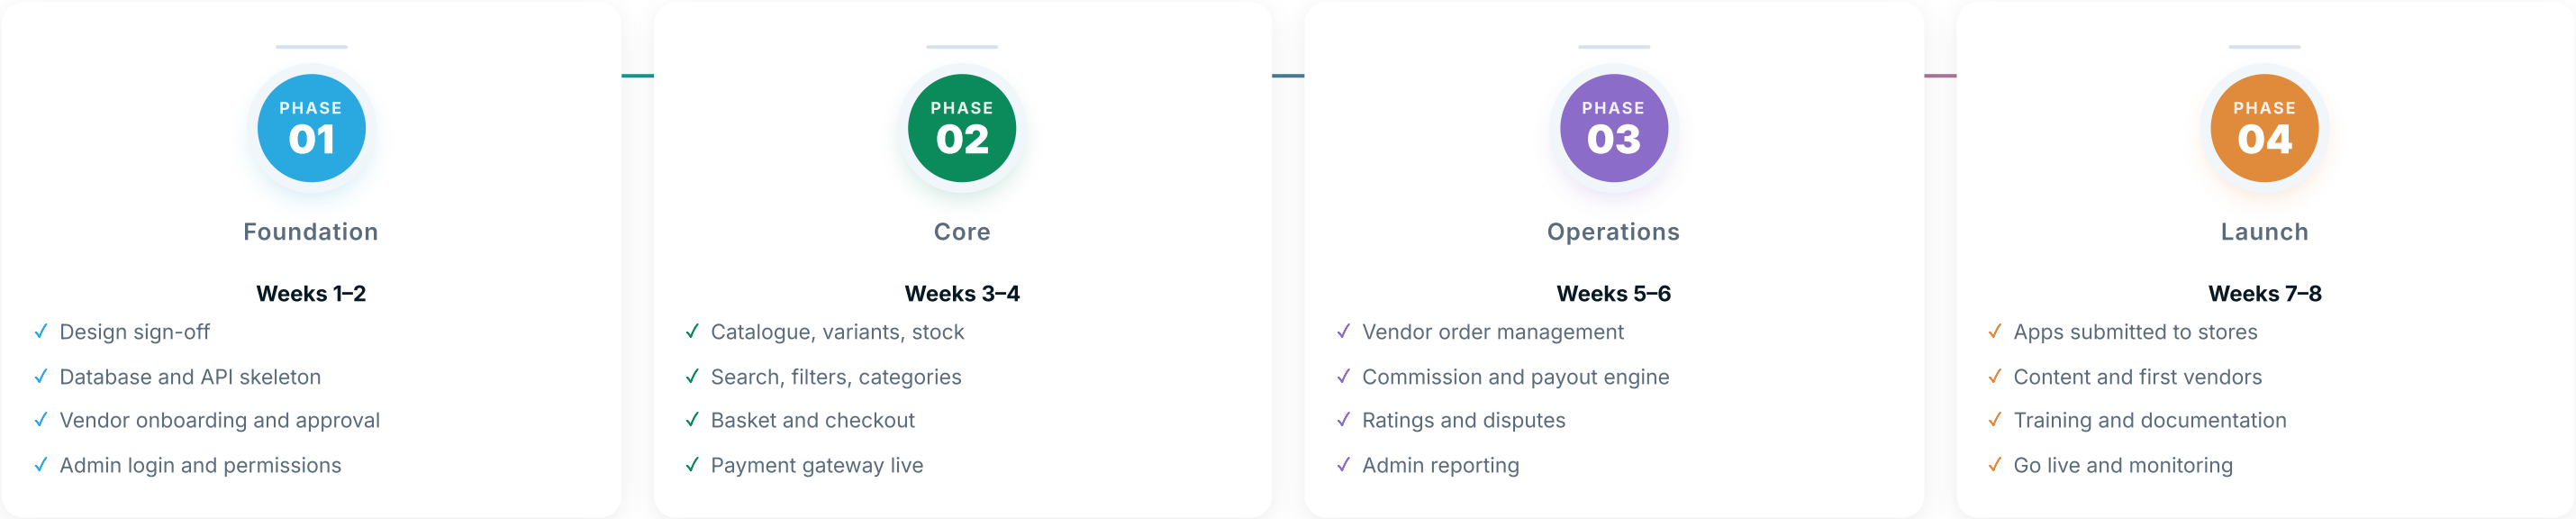

- > Standard cloud hosting
- > Scales with traffic
- > Daily backups
- > SSL and patching

Handover

- > Source code is yours
- > Written documentation
- > Admin training
- > Optional support retainer

Build phases

Each phase ends with something you can open and use. Nothing is invisible for weeks at a time.

What it costs

Fixed price for the scope described. Split across the phases above, each invoiced on completion.

Starter

Web platform only, no mobile apps

R12,000

✓ All customer and provider web screens

✓ Admin dashboard

✓ One payment gateway

✓ 8 week build

RECOMMENDED

Standard

Web plus customer mobile apps

R18,000

✓ Everything in Starter

✓ iOS and Android customer apps

✓ Store submission handled

✓ Push notifications

Complete

Web plus customer and provider apps

R28,000

✓ Everything in Standard

✓ Provider mobile app

✓ Advanced reporting

✓ 3 months support included

If you can imagine it, we can design it.
